PRINT

EJ-640

SOLJET EJ-640

High productivity with low running costs

The SOLJET EJ-640 delivers high-quality productivity and profitability that the nearest competitor models simply cannot provide. With operating costs that offer significant savings, you'll be able to grow your margins and your business. With its sturdy industrial design, the EJ-640 is the ideal production machine for busy high-volume print shops, and is ideal for the production of posters, banners, fleet graphics, signs and more. It features dual staggered printheads, an advanced media system for long unattended print runs and an integrated tri-heater system for fast drying. The EJ-640 runs optimally with high-capacity 1 litre GREENGUARD Gold certified EJ INK in dual CMYK or CMYKLcLmLk configurations to deliver bold, exciting colours. Powerful Roland VersaWorks 6 RIP software is included.

VersaEXPRESS RF-640

Productive print at an affordable price

The RF-640 4-colour eco-solvent printer offers impressive productivity and reliability at an exceptional price. Roland's most affordable 1625mm printer delivers outstanding prints day in and day out. Produce banners, posters, wraps, signs and more. The RF-640 features a mirrored CMYKYMC printhead configuration for maximum quality, GREENGUARD Gold certified ECO-SOL MAX 2 inks and Roland VersaWorks 6 RIP. To boost productivity, front-loading ink cartridges can be replaced without stopping the printer and for uninterrupted unattended production, the RF-640 automatically switches to a new ink cartridge when the original is empty. Remotely manage production, test printing and cleaning functions with the Roland Printer Assist app.

RF-640

Roland DG is a market-leading manufacturer of digital wide format inkjet and sublimation printers, cutters, printer/cutters, 3D printers, inks and software whose world-renowned reputation is backed up by unrivalled training and support. Preferred for their unbeatable reliability, versatility and quality, Roland devices produce stunning outdoor and indoor applications including signs, banners, posters, labels, vehicle graphics, POS displays, customised merchandise, industrial personalisation and much more. Roland DG technology is distributed by an extensive network of professional and experienced authorised dealers.

INTEGRATED PRINT & CUT

VG2-540

TrueVIS VG2-640 and VG2-540 The Power to Excite

With more than 40 exciting enhancements, TrueVIS VG2 printer cutters are engineered to exceed the quality and production needs of today's most demanding print professionals, with prints that can be finished in as little as 6 hours*. In addition to the superior vibrancy of new TR2 ink with orange, the 54-inch TrueVIS VG2-540 and 64-inch TrueVIS VG2-640 feature new colour management presets for superior colour reproduction, improved machine efficiency, and increased print and cut accuracy. Plus, prints are certified for quality and reliability with 3M™ and Avery™ product warranty available. Includes Roland VersaWorks 6 RIP.

*Tests performed by Avery Dennison on MPI Range digital media. When using this media, prints produced on VG2 with TR2 Ink can be laminated after a 6-hour period when rolls or images are properly ventilated and loosely wound.

TrueVIS SG-540 and SG-300 Build an unbeatable business

Up to 60% faster than previous comparable models, the SG-540 (1371mm) and SG-300 (762mm) printer cutters deliver Roland DG's renowned quality, reliability and cutting-edge features, at an exceptional price. If you're just starting out, the SG provides the versatility and ease-of-use you need to attract customers and start making money, fast. If you are looking to extend your current production, you can expand the profitable range of products you offer. Two FlexFire printheads work in synergy with GREENGUARD Gold certified TrueVIS INK in CMYK configuration for outstanding image quality and colour results. Advanced cutting technology delivers superb accuracy and downforce and a Bluetooth enabled mobile control panel allows remote printer management via your smartphone or tablet. Includes Roland VersaWorks 6 RIP.

SG-540

Tablet not included

XR-640

SOLJET PRO4 XR-640 High speed integrated print & cut

The XR-640, Roland DG's fastest and most productive integrated printer cutter, lets you print and cut signs, banners, decals, vehicle graphics, and more, with speed and precision. Two mirrored in-line printheads maximise productivity and quality. The XR-640 also features an integrated tri-heater system for fast drying, and GREENGUARD Gold certified ECO-SOL MAX 2 inks, available in four configurations including CMYK, Lc, Lm, White, Metallic and Light Black. Includes Roland VersaWorks 6 RIP software.

INTEGRATED PRINT & CUT

VersaSTUDIO BN-20 Print and cut from your desktop

Compact and versatile, the BN-20 is a powerful profit-making device, ideal for printing garment heat transfers, stickers, labels, small signs, posters and more. With a media width of 515mm, the BN-20 desktop printer/cutter is available in CMYK, CMYK+White and CMYK+Metallic Silver options. Includes Roland VersaWorks 6 RIP software.

TEXTILE

VersaSTUDIO BT-12 Affordable and easy to use DTG Printer

The VersaSTUDIO BT-12 is an easy-to-use, reliable, compact direct-to-garment (DTG) printer that's designed to effortlessly produce custom products like T-shirts, clothes, apparel and accessories. Start building a custom graphics business right out of the box or diversify your current graphics output with quick-printed promotional items. The VersaSTUDIO BT-12 direct-to-garment printer has a print resolution of 1200 x 1200dpi, delivering high-quality results and impressive colour quality. Its compact, desktop size fits anywhere, including locations with limited space, such as gift stores, kiosks, and apparel shops as well as at temporary events. With a minimal initial investment, the BT-12 provides profitable personalisation services to draw more customers to your business.

Textart RT-640 and XT-640 Simply powerful dye sublimation printing

Delivering bold and vibrant colours with subtle gradations and remarkable fine detail, the XT-640 and RT-640 are available in two ink configurations: 4 colours (CMYK) or 8 colours (CMYK+Lc+Lm + Orange + Violet). The 8-colour version offers an extremely wide colour gamut, whereas the 4 colour version offers greater speed. A media Feed Adjuster provides even tensioning and prevents skewing, which delivers a precisely wound roll, to aid smooth transition to the next heat press process. Equipped with the Roland Ink Switching System when in four-colour configuration, this innovative system allows the printer to automatically switch to a new ink pouch when the original runs out, providing up to 2000ml of ink per colour for unattended printing. Includes Ergosoft Roland Edition 2 RIP software or Roland VersaWorks 6 RIP (RT-640 only).

UV

VersaUV LEF-300, LEF2-200 and LEF-12i

Customise, personalise, brand virtually any substrate or item

The VersaUV LEF range of benchtop UV printers is used by professionals worldwide as a cost-effective solution to print directly on substrates and objects up to 100mm in height. Print full colour, high resolution images and text on a wide range of substrates including acrylic, wood, board, plastic, fabric, leather, eco-leather, metal* and glass*. The VersaUV series offers the efficient customisation of branded merchandise, industrial goods, product prototypes and much more. ECO-UV ink is available in CMYK plus Gloss for unique textured effects and White for brilliant spot colour and bright colour quality on dark or clear surfaces. An optional on-board primer with the LEF2-200 and LEF-300 further increases efficiency by streamlining the print process on materials such as acrylic and plastic.** Includes Roland VersaWorks 6 RIP software.

Maximum print areas: LEF-12i: 305mm x 280mm,
LEF2-200: 508mm x 330mm,
LEF-300: 770mm x 330mm.

* Primer may be needed for certain applications.

**Primer ink adhesion may vary depending on substrate and conditions. Testing

VersaUV LEJ-640

UV-LED printer for rigid materials and rolls

The VersaUV LEJ-640 (1625mm) prints CMYK, White and Gloss ink on roll or flat materials up to 13mm in depth. Handles large rolls up to 40kg in weight and sheets up to 12kg. The UV-LED lamps dry ink instantly and release no heat, making it possible to print on heat-sensitive materials. Offering impressive versatility for the production of a huge range of large-format graphics such as billboards, signs, packaging prototypes and much more. Includes Roland VersaWorks 6 RIP software.

VersaUV LEC-540 and LEC-330

Print, emboss, crease and contour cut with a single device

With the 762mm (LEC-330) and 1371mm (LEC-540) VersaUV LEC printer cutters, it is easy to create realistic proofs, vibrant packaging prototypes and short run labels on a variety of substrates, in one seamless workflow. The LEC prints CMYK, White and matt or gloss layers to add special effects and a luxurious finish to customised graphics. Direct print on a wide range of media, including standard sign media, foils, clear and metallic stock, synthetic and natural leather, textiles, window coverings and BOPP, PE and PET film. Also prints on semi-rigid sheets such as card stocks and polycarbonates up to 1mm thick. Includes Roland VersaWorks 6 RIP software.

VersaUV LEJ-640FT

UV-LED flatbed printing at up to 150mm in height

The VersaUV LEJ-640FT UV-LED flatbed printer enables direct printing of ECO-UV CMYK, White and Gloss ink on objects and flexible and rigid materials up to 150mm in height and 100kg in weight. With a large print area of up to 1.6m x 2.4m, the LEJ-640F is ideal for a wide range of applications including signs, displays, fine-art graphics, interior decoration items, promotional goods and packaging prototypes. Add value and creativity to your output with ECO-UV White and Gloss inks. Print crisp eye-catching graphics on a range of coloured and transparent substrates and layer clear ink to create textures, embossing, gloss and matt effects. Includes Roland VersaWorks 6 RIP software.

LEJ-640FT

CUT

GR-640

CAMM-1 GR-640, GR-540 and GR-420

Cuts more. Cuts faster. Cuts tougher.

The new CAMM-1 GR series takes cutting productivity, precision and strength to the next level. Delivering up to 1,485mm per second, the GR cutter boasts the fastest throughput in its class and delivers an impressive 600g of downforce to cut through difficult media with a single pass. Performance-enhancing features include an intuitive overcut function to deliver sharp, clean corners on challenging media and a dual position cutting carriage for standard and perforated cutting, ideal for die-cut decals. GR cutters offer incredible versatility in terms of media compatibility and electronic pinch rollers with 10 pressure settings to handle soft flock, thin window tint, thick reflectives and more, with ease. Produce an impressive range of applications including window and floor graphics, signs, labels, packaging prototypes, vehicle graphics and more. The GR series is a great addition to any business; either as a stand-alone cutting solution or paired with an existing printer. 1,651mm (GR-640), 1,397mm (GR-540) and 1,075mm (GR-420) models available. Includes Roland CutStudio software.

CAMM-1 GS-24

Cutting performance to build your business on

With its redesigned cutting carriage and blade holder, the GS-24 offers higher stability and 40% more downforce than its predecessor (up to 350g) to cut even tough materials such as flock and flex. The overlap cutting function (up to 10x) enables the easy, precision cutting of thicker media including sandblast material and card stock. Other useful features include perforated cutting functions plus the option of cutting per line colour. Cut precision graphics up to 584mm in width to produce vehicle wraps, signage, stickers, textile transfers, packaging prototypes and more. Designed as a desktop device, the GS-24 can also be mounted on a stand. Includes Roland CutStudio software.

GS-24

STIKA SV-15, SV-12 and SV-8

Portable and affordable precision desktop cutters

Available in 160mm, 250mm and 340mm cutting widths, the user-friendly and compact STIKA series cuts vinyl for signs and stickers, textile transfers, films and more. The provided CutStudio software can split up designs, to enable cutting of larger designs.

Roland DG Care

Roland DG Care is a complete range of premium services and products to help our customers throughout the lifecycle of their experience with Roland DG. Some of the services offered as part of the program are comprehensive training solutions, industry leading warranty programs and dedicated finance programs.

www.rolanddgcare.com.au

Roland Academy

Roland Academy offers specialised training to assist our customers to get the most out of their Roland equipment and maximise the return on their investment.

Our VersaWorks training courses, as part of Roland Academy, have been developed to meet the expanding needs of the Print Professional. The courses focus on competency-based training to help students develop their skills and take their knowledge of Roland VersaWorks, Roland VersaWorks 6 and colour management to the next level.

RolandClinic sessions are free one-on-one consultations with our Roland technical and product specialists. You can bring along materials, files and any questions or issues you have, that our experienced staff may assist you with.

www.rolanddg.com.au/academy

Roland Rental

Roland Rental, Roland DG's trusted finance program, has been leading the way in the industry since 2007. The program makes it easy to obtain a Roland device, with no upfront investment and simply monthly payments.

Roland Rental has evolved from the simple Roland Rental option on equipment only, to now offering Roland Rental Plus and Roland Rental Platinum. The new packages include extra items such as ink and service costs, giving customers greater choice and flexibility whilst making it easy for them to get their business up and running without the upfront investment.

www.rolanddg.com.au/rental

Roland Cartridge Recycle Program

In partnership with Close the Loop, we have structured our Cartridge Recycle Program to ensure the simple and efficient collection of empty Roland inkjet cartridges. In collaboration with the Roland DG dealer network, the cartridges are collected and returned to Close the Loop, Australia's largest recycling and resource recovery company for imaging consumables.

Driven by a philosophy of zero waste to landfill, Close the Loop reuses or recycles 100% of every inkjet cartridge that we return to them.

Simply drop your cartridges at your local dealer, give them to an Authorised Roland technician at your next scheduled service, or contact us for further options. The empty cartridges will then be packaged up and sent to Close the Loop for processing.

www.rolanddg.com.au/recycle

Industry Leading Warranty

There's no question that Roland DG wide format inkjets combine unbeatable performance with legendary Roland reliability. As further proof, Roland DG offers an unprecedented Three and Five-Year "Heads and all Warranty" program for selected products.

When you register your Roland DG wide format inkjet within 30 days of installation, you are eligible for an additional 2 or 4 years of Roland DG Care Extended on-site service guarantee. All you have to do is ensure that your inkjet system uses our premium OEM inks and is serviced regularly and in accordance with the product maintenance schedule by authorised Roland Service Technicians.
