

Start and end points  
do not match

Material is stripped  
off the cutting edge

Doesn't cut accurately

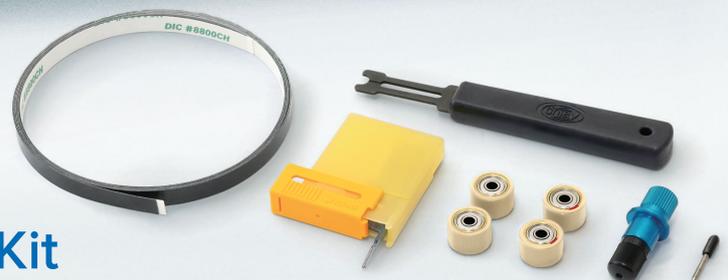

# Does your vinyl cutter display these symptoms?

Cut line is wavy

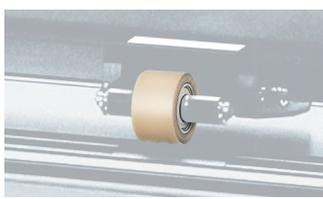

Cut line appears stitched

Cutting accuracy is poor

**Cut like new with the  
Vinyl Cutter Self-Maintenance Kit**

# Maintenance is required to solve these issues.

## Degradation of pinch rollers

When the surface of the pinch roller deteriorates and it becomes impossible to feed a vinyl sheet evenly, the start and end points will not match.

Start and end points do not match  
Cutting accuracy is poor

## Degradation of the cutter protection strip

If the surface of the cutter protection strip is scraped and the cutter blade enters the groove, blade jumping and a wavy cut will occur.

Start and end points do not match
